

CosmiKids pre-school launches its first international location in Mumbai

CosmiKids, the revolutionary Los Angeles-based pre-school and child enrichment center concept, opened its first international location in Santacruz (West), Mumbai on May 19th with a grand opening event packed full of fun for children, parents and the community. There was a free roster of events with a parent and child meditation for peace, led by visiting CosmiKids founder, child enrichment specialist, celebrated author and engaging media personality Judy Julin.

The CosmiKids environment incorporates unique methods to enhance the social and creative skills of today's child. Children explore a series of cleverly designed interactive Stations of Discovery™ which mix imaginative play with self-discovery. The distinctly designed Stations cleverly work on all six senses (including intuition) and offer a visual adventure packed with color, design, poetry and rainbow lighting. Bela Kotwani, CEO of the local CosmiKids center says, "I feel sure that Mumbai families understand that tomorrow's world is likely to require more of our children in terms of collaboration, creativity and mutual respect and more of us as parents - CosmiKids is here to address those things in new ways that are fun and engaging."
